

Weekly Media Monitor

Sep 07th, 2026 – Sep 13th, 2026

This week's major news updates in Pakistan's energy and climate sectors:

- ➔ The Pakistan Bureau of Statistics (PBS) reported that Sensitive Price Indicator (SPI) inflation rose to 8.62 percent year-on-year in the week ended 10 September 2026, driven by higher petrol, diesel and LPG prices despite declines in prices of key food items.
- ➔ The federal government increased petrol prices by 5.02 rupees per litre and high-speed diesel (HSD) prices by 5.28 rupees per litre, fixing rates at 375.82 rupees and 403.32 rupees per litre, respectively, for three days from 12 September 2026.
- ➔ The National Electric Power Regulatory Authority (Nepra) approved an 11-year power plan requiring 58 billion dollars in investment, while deferring 900 million dollars battery storage pending further study.
- ➔ British International Investment (BII) expressed interest in investing in Pakistan's power transmission sector and utility-scale battery storage, as the government plans to modernise the national grid and add 3,000 megawatts of battery storage capacity.
