

Weekly Media Monitor

Aug 31st, 2026 – Sep 06th, 2026

This week's major news updates in Pakistan's energy and climate sectors:

- ➔ The National Electric Power Regulatory Authority (NEPRA) will make Battery Energy Storage Systems (BESS) mandatory, requiring a minimum of 10 per cent of firm capacity for wind and solar projects in the upcoming 800MW renewable energy auction, to improve grid flexibility and address the duck curve challenge.
- ➔ The World Bank has proposed a catastrophe bond for Pakistan, initially worth 500 million dollars and eventually rising to 1 billion dollars, to provide rapid funding and absorb fiscal shocks caused by major climate disasters.
- ➔ The National Electric Power Regulatory Authority (NEPRA) has increased electricity costs by 2.06 rupees per unit through the July fuel cost adjustment and added a 52-paisa quarterly tariff adjustment, imposing an additional burden of approximately 46 billion rupees on consumers.
- ➔ The federal government has reduced petrol prices by 3.13 rupees per litre while increasing high-speed diesel (HSD) prices by 3.74 rupees per litre, setting the rates at 345.87 rupees and 378.05 rupees per litre, respectively, for three days starting 5 September 2026.

 Coal	 Oil and Gas	 Renewable Energy	 Energy and Finance	 Climate Change
	Govt increases petrol price by Re0.77, decreases diesel's by Rs1.03 per litre	Developing the battery recycling industry	Rethink energy deals	The water nexus: from climate risk to economic resilience
