Weekly Media Monitor

Oct 5th, 2026 – Oct 11th, 2026

This week's major news updates in Pakistan's energy and climate sectors:

- Pakistan's Deputy Permanent Representative to the UN, Usman Jadoon, called for 300 billion dollars in climate finance, tripled adaptation funding, and a fully capitalized Loss and Damage Fund, plus cooperation on shared waters and debt reform.
- Sindh Engro Coal Mining Company (SECMC) started Phase-III expansion of Thar Block-II, raising coal output from 7.6 million to 11.2 million tonnes per year. This aims to save 220 million dollars in fuel imports and 15 billion rupees in power costs while lowering coal tariffs.
- The IMF requested more data before approving a new industrial tariff that raises monthly capacity charges to 7,000–8,000 rupees but cuts off-peak rates to improve grid use.
- NEPRA reviewed the 22.98 rupees per unit discounted tariff for industry and agriculture. Supply costs exceed the tariff, shifting the burden to other consumers and raising sustainability concerns.
- The Privatisation Commission pre-qualified nine parties, including Turkish and Pakistani firms, to bid for 51–100 per cent stake and management control of GEPCO.

Coal	Oil and Gas	Renewable Energy	Energy and Finance	Climate Change
Thar coalmine begins third expansion	'Govt providing relief despite rising fuel prices'	Competitiveness hinges on affordable, sustainable energy	When imported energy becomes the risk	Climate change threatens Kalash life
