

Weekly Media Monitor

April 28th - May 04th, 2025

This week's major news updates in Pakistan's energy sector include:

- The 300-megawatt coal-fired power project in Gwadar faces delays due to requests by its Chinese sponsor for tariff revisions and extension in the Letter of Support without additional fees.
- Power sector's circular debt rises to 2.4 trillion rupees, signalling that the government's efforts to curtail it have been insufficient.
- Prime Minister Shehbaz Sharif approves the new 10-year Indicative Generation Capacity Expansion Plan (IGCEP 2025–35), targeting 17 billion dollars in savings by rescheduling and eliminating several previously planned projects.
- Pakistan's solar adoption surge leaves out middle-class and urban apartment dwellers due to high upfront costs and other structural barriers.
