

Weekly Media Monitor

Sep 21th, 2026 – Sep 27th, 2026

This week's major news updates in Pakistan's energy and climate sectors:

- ➔ The Cabinet Committee on Energy (CCOE) reported power-sector circular debt reached 1.798 trillion rupees by June 2026. It noted that K-Electric's 171 billion-rupee non-payment blocked a potential 175 billion-rupee reduction, and directed faster reforms to curb future deficits.
- ➔ The Independent System and Market Operator (ISMO) launched Pakistan's first 400MW competitive power wheeling auction under the Competitive Trading Bilateral Contract Market (CTBCM). A total of 800MW will be auctioned over five years, allowing large consumers to directly procure electricity from power producers.
- ➔ Finance Minister Muhammad Aurangzeb called for faster access to international climate financing. He stressed the need to convert Pakistan's climate commitments into investable projects focused on clean energy, renewables, and climate resilience.
- ➔ Petroleum Minister Ali Pervaiz Malik warned petrol prices could reach 1,000 rupees per litre if a fuel shortage emerges. The government expects a domestic crude oil discovery by October to help reduce reliance on expensive imports.
