Weekly Media Monitor

Oct 12th, 2026 – Oct 18th, 2026

This week's major news updates in Pakistan's energy and climate sectors:

- Power Division projects 2.56 rupees per unit Fuel Cost Adjustment (FCA) for Sept 2026, adding 32.7 billion rupees to Nov bills.
- The Central Power Purchasing Agency (CPPA) reports a 37.5 per cent year-on-year rise in September's average power fuel cost to 10.02 rupees per unit. Drop in LNG and nuclear, plus higher use of costly imported coal and HSD, drove the increase.
- Pakistan plans 22 LNG cargoes worth approx 1. 29 billion dollars fron Nov 2026- Feb 2027.
- Exporters oppose proposed 5–10 per cent electricity tariff hikes by distribution companies (DISCOs), warning that higher fixed charges and pass-through costs will hurt Pakistan's export competitiveness.
- The Federation of Pakistan Chambers of Commerce and Industry (FPCCI) urges NEPRA to reject 268 billion rupees in DISCOs' disputed prior-year tariff adjustments.
- Petroleum Minister Ali Pervaiz Malik urges refineries to explore Libyan crude to diversify supply, while a Turkish seismic vessel will start Indus Basin data acquisition next month.
- Fair Finance Pakistan (FFP) says 7 major banks have weak climate/biodiversity policies. Climate policy coverage is only 13.8 per cent and biodiversity 26.8 per cent, despite SBP's push for climate-risk integration.
