Weekly Media Monitor

Oct 19th, 2026 – Oct 25th, 2026

This week's major news updates in Pakistan's energy and climate sectors:

- Prime Minister Shehbaz Sharif approves the draft Auto Policy 2026–31 which lowers vehicle import tariffs, incentivises electric vehicle adoption and aims at increasing the global competitiveness of local auto industry.
- The National Electric Power Regulatory Authority (Nepra) faces pressure to reject a further extension of Port Qasim Electric Power Company's interim coal procurement arrangement, since a fresh bidding can potentially lower power generation costs.
- Chinese power projects under the China-Pakistan Economic Corridor (CPEC) are owed 498 billion rupees by the Central Power Purchasing Agency-Guarantee (CPPA-G), including 79 billion rupees owed to Port Qasim Electric Power Company and around 80 billion rupees to the Sahiwal coal-fired power plant.
- The Power and Petroleum Divisions inform the National Assembly that power-sector circular debt rises by 34 billion rupees to 1.675 trillion rupees and gas-sector circular debt increases by 344 billion rupees to 3.631 trillion rupees by June 2026.
- The Petroleum Division urges the government to approve import of 22 LNG cargoes worth nearly 2 billion dollars for November 2026 to February 2027, warning that a delay in imports could force gas cuts to industry, power and fertiliser sectors during peak winter demand.
