

Weekly Media Monitor

February 2nd, 2026 – February 8th, 2026

This week's major news updates in Pakistan's energy and climate sectors:

- ➔ The Ministry of Maritime Affairs designates Port Qasim as a future energy hub linking it with a rail project that will carry Thar coal to different parts of Pakistan. Energy analysts, however, warn the rail project could become a stranded asset, unable to earn its keep due to projected decline in national coal demand.
- ➔ The National Electric Power Regulatory Authority (NEPRA) moves to replace solar net metering with net billing under draft Prosumer Regulations 2025 and schedules a public hearing.
- ➔ The federal government directs all ministries to submit pro-climate budget proposals for fiscal year 2026-27 as the European Union threatens to restrict exports exceeding carbon emission thresholds.
- ➔ NEPRA takes legal action against government-owned distribution companies (DISCOs) for failing to credit solar units to net-metering consumers.
