

Weekly Media Monitor

Aug 03th, 2026 – Aug 09th, 2026

This week's major news updates in Pakistan's energy and climate sectors:

- ➔ Petroleum Minister Ali Pervez Malik says Pakistan expects \$5 billion in investment agreements from September 2026 to modernize ageing oil refineries and convert them to deep-conversion facilities.
- ➔ Sindh Engro Coal Mining Company (SECMC) plans to increase coal production from Thar by 47% starting September 2026. The goal is to support domestic power generation and reduce reliance on imported coal.
- ➔ The government has waived Nepra approval for grid-connected solar systems up to 25 kW. Distribution companies can now directly approve rooftop solar installations, cutting regulatory delays for households and small businesses.
- ➔ Record surge in lithium battery imports amid solar shift. Business Recorder Research reports record-high lithium battery imports as Pakistan's shift to solar power drives demand. This is also changing the battery-to-solar panel import ratio.
- ➔ The government plans to unbundle SNGPL and SSGCL into five entities: one national transmission company and four provincial distribution firms, as part of broader gas sector reforms.
